## Terms and Conditions

### Copyright

All of the materials on both the CD and the Website are Copyright Bob Ansell and Mathematical Publishing. No copying or use of these materials is permitted without the express permission of Mathematical Publishing. This permission will be given in writing or in the form of a licence.

### Individual Licence

An individual licence allows the buyer to make unlimited copies of the resources for their own use. The CD itself may not be copied and the resources may not be loaned or made available to other teachers or student teachers. A copy of this order form may be passed on.

### School Licence

A school licence allows any teacher or any person employed directly by the school to make unlimited copies of the resources exclusively for use in that school or for children to use at home. Under no circumstances may the CD itself be copied.

### How to calculate the cost of a school licence

A school pays for one CD at the usual price plus 10p per child, based on the number on roll. A school will always receive at least one **additional** CD. Schools with 200-399 on roll will receive two **additional** CDs; schools with 400-599 on roll will receive three **additional** CDs.

### Additional Copies

A school may order additional CDs, over and above those it is entitled to with its licence. If additional CDs are ordered at the same time as the licence the cost is £15.00 each.

### Other Licences

Other licences are available for HE Institutions or Local Education Authorities on application to the address on the order form.

### Contents

While every effort is made to ensure that the CD reflects the contents illustrated on paper and on the website, Mathematical Publishing reserve the right to update and develop this CD in the light of their own professional judgement and feedback from customers.
